

WEEKLY DIESEL PRICES REPORT

Week ending 24 March 2019

Please find attached a copy of the latest AIP Weekly Diesel Prices Report. All data, charts and tables in this Report are based on the latest available market data to **Sunday, 24 March 2019**.

For more detailed information on:

Pricing Facts – see

www.aip.com.au/pricing/facts.htm

Terminal Gate Prices (wholesale) – see

www.aip.com.au/pricing/tgp.htm

Pump Prices (retail) – see

www.aip.com.au/pricing/retail.htm

International Fuel Prices – see

www.aip.com.au/pricing/international.htm

In the AIP Weekly Diesel Prices Report:

- the data for international crude oil and diesel prices is supplied by S&P Global, Platts (see www.platts.com).
- the data for wholesale diesel prices is based on market data published by AIP member companies (BP, Viva Energy Australia, Mobil and Caltex) (see www.aip.com.au).
- the data for retail diesel prices is based on available market data supplied by MotorMouth (see www.motormouth.com.au).

Should you have any questions about the material in this report, please contact AIP at aip@aip.com.au.

The Australian Fuel Market - An Overall Snapshot

Understanding Movements in Key Diesel Price Indicators

The Chart below provides an overall 'snapshot' of movements in key market indicators relevant to the price of diesel in Australia.

The Australian refining sector is a price taker. Domestic prices are closely linked to international prices. The Singapore benchmark price of diesel (Gasoil 10ppm sulfur) is the key diesel price benchmark for Australia. As the chart below shows:

- the Gasoil price plus shipping costs and Australian taxes represents almost the entire wholesale price of diesel (around 95%)
- there is no retail discounting cycle (i.e. sawtooth pattern) for diesel, as only 25% of diesel is sold through retail outlets and most of this goes to contract or fuel card customers rather than private motorists; most diesel is sold in bulk to commercial/industrial customers (e.g. mining, transport and farming) on long term contract; such contracts are subject to rigorous competition under regular market tenders.

Average Diesel retail price this week: 149.1 cents
Average Diesel wholesale price this week: 136.7 cents

NOTES

(1) **INTERNATIONAL DIESEL PRICE:** the international diesel prices are provided by Platts (Copyright © 2017 S&P Global Platts, all rights reserved), and represent the end of day assessment for the price of Gasoil (50ppm sulfur from 1 January 2006, and 10ppm sulfur from 1 January 2009). No portion of the publication may be photocopied, reproduced, retransmitted, put into a computer system or otherwise redistributed, without prior written Authorisation from Platts. Platts is a trademark of S&P Global. Information has been obtained from sources believed reliable. However, because of the possibility of human or mechanical errors by sources, S&P Global or others, S&P Global does not guarantee the accuracy, adequacy or completeness of any such information and is not responsible for any errors or omissions or for results obtained from use of such information.

(2) **SHIPPING:** AIP estimate, based on various sources (e.g. Platts, ACCC, Australian Petroleum Statistics and the Reserve Bank of Australia).

(3) **TAXES:** is excise and GST less any relevant state rebates weighted by fuel volume consumed in each State.

(4) **NATIONAL AVERAGE WHOLESAL PRICES:** are derived from capital city prices weighted by fuel volume consumed in each State.

(5) **NATIONAL AVERAGE RETAIL PRICES:** are calculated as the weighted average of each State/Territory's metropolitan and non metropolitan retail diesel prices, with the weights based on the number of registered diesel vehicles in each of these regions.

International Market Trends

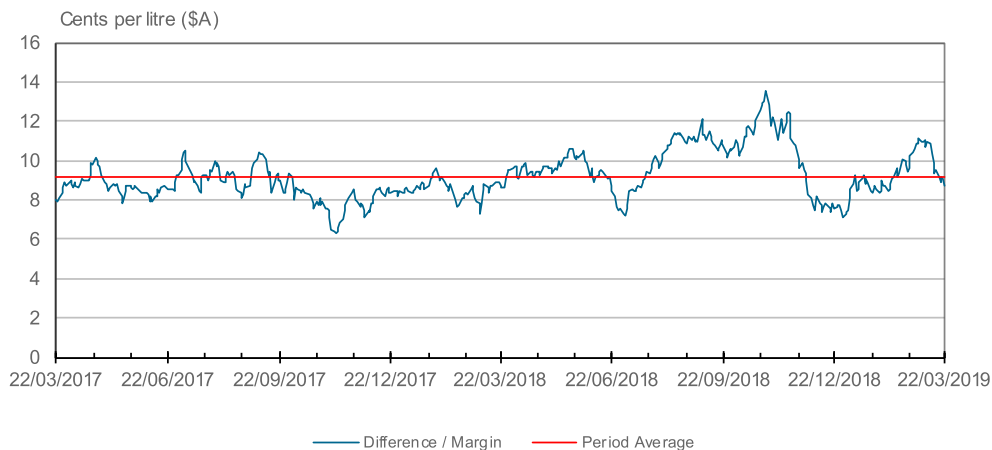

Figure 1: Comparison of Singapore Diesel Price (Gasoil) with Crude Oil Prices

NOTE: Australia is part of the Asia Pacific fuel market (Singapore is the regional refining/distribution centre) and the relevant pricing benchmarks in this market are Singapore prices for diesel (Gasoil 10ppm sulfur) and Tapis and Dated Brent for crude oil. Prices for Gasoil 10ppm sulfur diesel and for Tapis and Dated Brent crude oil are provided by S&P Global, Platts. Platts have publicly reported that countries across the Asia-Pacific region including Australia are increasingly moving to using Dated Brent as the relevant crude pricing benchmark for crude oil contract purposes and spot transactions. Caltex Australia has also indicated in public statements a shift to Dated Brent crude pricing. For information on crude oil pricing and Dated Brent pricing in Asia see <http://www.aip.com.au/pricing/crude.htm>.

Figure 2: Difference Between Market Prices

Singapore Diesel price minus Tapis Crude Oil price

NOTE: The refiner margin above is the difference between market prices for Gasoil and Tapis. It is not a figure determined by refiners.

Cents per litre (A\$)	TAPIS CRUDE OIL	DATED BRENT CRUDE OIL	GASOIL
Average: Last Week (to Friday 22/03/19)	62.8	59.6	71.8
Average: Previous Week (to Friday 15/03/19)	62.4	58.7	72.4
Average: Last 4 Weeks	61.9	58.1	72.1
Average: Last 12 Weeks	58.7	55.4	68.1
Average: Last 12 Months	63.1	60.6	73.0

PLEASE NOTE

Differences/margins between market prices or benchmarks are used as indicators of general trends in the petroleum market, **they do not represent profits** accruing to oil companies at the refining, wholesale or retail segments of the market. For each market segment, a range of costs would need to be deducted to determine actual profits.

Australian Wholesale Market Trends

Figure 3: Comparison Of Australian Diesel TGP (Or 'Wholesale Price') With Singapore Diesel Price (Gasoil)

NOTE: The Gasoil prices and Shipping rates are provided by S&P Global, Platts, see Notes on page 2.

Figure 4: Difference Between Market Prices

National Average Diesel TGP minus Singapore Diesel Price (plus shipping & taxes)

GASOIL	Cents per litre (A\$)	DIESEL TGP (National Average)	Cents per litre (A\$)
Average: Last Week (to Friday 22/03/19)	71.8	Average: Last Week (to Friday 22/03/19)	136.7
Average: Previous Week (to Friday 15/03/19)	72.4	Average: Previous Week (to Friday 15/03/19)	137.0
Average: Last 4 Weeks	72.1	Average: Last 4 Weeks	136.5
Average: Last 12 Weeks	68.1	Average: Last 12 Weeks	130.8
Average: Last 12 Months	73.0	Average: Last 12 Months	136.4

PLEASE NOTE

Differences/margins between market prices or benchmarks are used as indicators of general trends in the petroleum market, **they do not represent profits** accruing to oil companies at the refining, wholesale or retail segments of the market.

For each market segment, a range of costs would need to be deducted to determine actual profits.

For example, at the wholesale level, a range of costs (including 'landed costs' and 'wholesaling costs') would need to be deducted to determine actual profits at the wholesale level. These 'landed costs' include the costs of the quality premium (market cost) for Australian fuel standards, insurance and loss, and local wharfage costs. The standard 'wholesaling costs' include terminal operating costs, administration and wholesale marketing costs and corporate taxes and government charges on wholesaling activities.

Average Diesel Terminal Gate Prices (TGP's) Across Australian States/Territories

Week ended 24 March 2019

DIESEL (cents per litre \$A)

	Monday 18 March 2019	Tuesday 19 March 2019	Wednesday 20 March 2019	Thursday 21 March 2019	Friday 22 March 2019
Sydney	136.8	136.8	136.6	136.3	136.3
Melbourne	136.4	136.3	136.1	135.8	135.8
Brisbane	136.8	136.8	136.6	136.2	136.3
Adelaide	137.2	137.1	136.9	136.6	136.6
Perth	136.8	136.7	136.5	136.2	136.2
Darwin	140.5	140.5	140.3	139.9	139.9
Hobart	141.6	141.5	141.3	140.9	141.0

NOTES

Daily TGP data are published by all wholesale fuel suppliers. AIP's website presents average TGP data for each weekday – see www.aip.com.au/pricing/tgp.htm. This data has been prepared by ORIMA Research Pty Ltd on behalf of AIP, using information from BP Australia, Caltex, Viva Energy Australia, and ExxonMobil Australia. Prices shown are the average TGP for diesel across each of these companies for the day.

Explaining The Time Lag Between Changes in Singapore Prices and Changes in Australian Wholesale Diesel Prices

Generally, there is a short time lag of 1-2 weeks between changes in Singapore prices and changes in Australian prices.

- The lag can be seen in FIGURE 3 on the previous page. That is, see the slight delay in the peaks and troughs in the pink line (National Average TGP) compared to the **purple line** (Gasoil 50ppm sulfur plus Shipping & Taxes).
- Importantly, this time lag occurs whether: prices are going up (when the lag slows price rises to consumers) or prices are going down (when the lag delays price falls).
- The lag is a result of using a rolling average of Singapore prices as part of the wholesale pricing methodology (very similar to that used by the ACCC when wholesale prices were regulated by government). The pricing methodology is called import parity pricing (IPP).
- The use of rolling averages smooths day-to-day price volatility.
- Not accounting for this lag, introduced by the rolling average, leads to incorrect conclusions about how Singapore prices flow through to prices in Australia.

The very close relationship between changes in Gasoil prices and changes in Australian TGPs can be seen by applying a rolling average to the Gasoil price data (a 7 day rolling average is used in the Chart to the right to illustrate this).

Australian Retail Market Trends For Diesel

Figure 5: Comparison Of Australian Pump Price With Australian TGP

Average Retail Diesel Price versus Average Wholesale Diesel Price

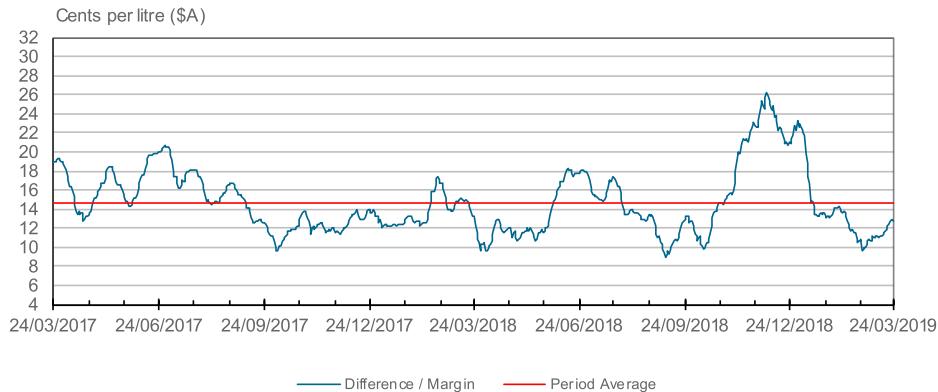

Figure 6: Difference Between Market Prices

Australian Average Retail Price minus Average Wholesale Price

Wholesale: Diesel TGP (National Average)	Cents per litre (A\$)	Retail: Diesel Pump Price (National Average)	Cents per litre (A\$)
Average: Last Week (to Friday 22/03/19)	136.7	Average: Last Week (to Sunday 24/03/19)	149.1
Average: Last Week (to Friday 15/03/19)	137.0	Average: Last Week (to Sunday 17/03/19)	148.3
Average: Last 4 Weeks	136.5	Average: Last 4 Weeks	147.7
Average: Last 12 Weeks	130.8	Average: Last 12 Weeks	144.4
Average: Last 12 Months	136.4	Average: Last 12 Months	151.1

PLEASE NOTE

- (1) The data for **retail diesel prices** is based on available market data supplied by MotorMouth (see www.motormouth.com.au).
- (2) There is a **time lag** between changes in Australian wholesale (TGP) diesel prices and the change in retail diesel prices which needs to be taken into account when comparing relative price movements. According to the ACCC, this time lag can be longer during times of significant volatility in international and wholesale diesel prices.
- (3) Differences/margins between market prices or benchmarks are used as indicators of general trends in the petroleum market, **they do not represent profits** accruing to oil companies at the refining, wholesale or retail segments of the market. For each market segment, **a range of costs** would need to be deducted to determine actual profits. For example **at the retail level**, a range of standard retailing costs would need to be deducted to determine actual profits. These costs include:
 - land transport costs (of getting fuel from the terminal gate to the petrol bowser)
 - administration and retail marketing costs
 - the costs of running service stations like wages, rent and utilities
 - corporate taxes and other government charges on retailing activities

Retail Diesel Price Trends Across States/Territories

Week ended 24 March 2019

'NATIONAL AND STATE' AVERAGE DIESEL PRICES (cents per litre \$A)

	Weekly Average	Weekly Change	Low	High
National Average	149.1	0.8	148.8	149.2
NSW / ACT	148.6	0.8	148.3	148.8
Victoria	148.2	0.4	147.9	148.6
Queensland	147.9	1.0	147.5	148.1
South Australia	148.6	0.7	148.3	149.1
Western Australia	149.7	0.9	149.4	150.0
Northern Territory	162.1	0.7	161.6	162.4
Tasmania	159.4	1.2	159.2	159.6

'METROPOLITAN' AVERAGE DIESEL PRICES (cents per litre \$A)

	Weekly Average	Weekly Change	Low	High
National Metropolitan Average	148.7	0.8	148.3	148.8
Five Major Capital City Average	148.3	1.0	147.8	148.5
Sydney	147.3	1.0	146.9	147.4
Canberra	151.9	0.5	151.4	152.2
Melbourne	149.5	0.5	149.0	150.0
Brisbane	149.0	0.9	148.6	149.1
Adelaide	148.3	1.5	147.2	149.2
Perth	147.6	1.0	147.2	148.1
Darwin	146.5	1.0	146.0	147.0
Hobart	158.1	0.8	157.8	158.3

'REGIONAL' AVERAGE DIESEL PRICES (cents per litre \$A)

	Weekly Average	Weekly Change	Low	High
National Regional Average	149.4	0.8	149.1	149.6
NSW / ACT	149.2	0.8	148.9	149.4
Victoria	146.7	0.3	146.6	146.9
Queensland	147.0	1.3	146.6	147.2
South Australia	148.6	0.7	148.3	149.1
Western Australia	152.6	0.7	152.4	152.8
Northern Territory	186.2	0.3	185.8	186.3
Tasmania	160.0	1.4	159.7	160.3

For more information on average weekly retail (pump) prices for diesel and petrol across Australia, please see www.aip.com.au/pricing/retail.htm

NOTES

- (1) The data for retail diesel fuel prices is based on available market data supplied by MotorMouth (see www.motormouth.com.au).
 - (2) The National Average Retail price is calculated as the weighted average of each State/Territory's metropolitan and non metropolitan retail diesel prices, with the weights based on the number of registered diesel vehicles in each of these regions.
 - (3) The National Metropolitan Average price is calculated as the weighted average of the retail diesel prices across each capital city, where the weights are based on the number of vehicles using diesel registered in each city.
 - (4) The Five Major Capital City Average is the unweighted average of the prices for Sydney, Melbourne, Brisbane, Adelaide and Perth.
 - (5) The Regional Average prices (including the National Regional Average) are calculated as the weighted average of the retail diesel prices for the non-metropolitan regions in each State/Territory, where the weights are based on the number of vehicles using diesel.
 - (6) The vehicle data source is *ABS Motor Vehicle Census, 2011, Cat No 9309.0*.
 - (7) 'Weekly Low' and 'Weekly High' are based on the lowest and the highest average daily prices in the relevant area.
 - (8) Weekly Average prices are a straight average of the seven days.
 - (9) Weekly Change is the change compared with the Weekly Average last week.
- For more information on data methodology, please see the AIP Website (www.aip.com.au/pricing/retail.htm).

Diesel Prices & Taxes in OECD Countries

September Quarter 2018

The Charts below shows Australia has among the lowest diesel prices of all OECD countries.

Diesel Prices and Taxes in OECD Countries
